

# Accordion sketchbook

## ART & CRAFT

---

*Journaling a special time in your life will help you to organise and process your thoughts.*

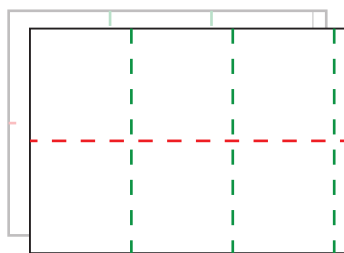

*Let's create your very special sketchbook. Usually we use this kind of accordion sketchbook for travels, we may not go very far this time but there is no limit for imagination :)*

*Everyday you can scribble, write or draw a detail of your environment. Describe an emotion or simply let your hand guides you and meditate through doodling. I believe there is no better way to lose track of time!*

*When all this will be over you will love exploring your sketchbook*

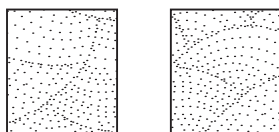

*\* You can customize your cover and make it unique!*
